Subject: Proteco Landfill Superfund Site: Notification of the East Boundary Fence Installation Schedule
Date: Wednesday, December 22, 2021 3:14:05 PM

Hello Zolymar,

We have been informed by Geosyntec that Right Way will mobilize to the Site on Monday January 17, 2022 to begin the east boundary fence installation work. The first activity will be to survey the fence route and then mechanically clear a pathway through the vegetation for the fence installation. Installation of the barbed wire fence would begin as soon as practical following the surveying and pathway clearing work. We will provide EPA with periodic updates on the progress of the east boundary fence work via email. We will also contact EPA if livestock are present at the Site during this work so that EPA can contact the livestock owner to have them removed.

It should be noted that current supply chain issues might affect the schedule for the construction of the barbed wire fence itself. Right Way is attempting to locate and obtain the fencing materials from local suppliers. EPA will be notified via email if a significant delay is anticipated due to fencing materials being backordered from the suppliers.

When the east boundary fence is completed, we will notify EPA via telephone and email and ask that you contact the livestock owner to visit the Site and remove his animals if any are remaining. Once EPA has confirmed all the livestock are removed from the Site, we will begin the installation of the erosion and stormwater control best management practices (BMPs) and continue with the Site clearing work. We will provide you with an updated estimate of the Site clearing schedule after the BMPs are installed at the Site.

Please contact me if you have any questions or need additional information.

Best Regards,

Dan Gainer, PG CSM
